

SFY01-02 Funding	Organization	Target Population	Service Location	Trained	Served	Reached	Final Reports
\$182,500 (\$91,250 + \$91,250)	ALS (Amyotrophic Lateral Sclerosis) Association-Nevada Chapter	Persons with ALS	Statewide		136		A total of 66 patients were served with 2275 calls to patients, caregivers and survivors. A total of 136 Nevadans were receiving some form of assistance at the end of June 2002. Opened satellite office in Carson City that provides coordination of monthly support group meetings and maintains an equipment loan closet, a video loan library, and a resource library. In addition to previously served areas of Las Vegas, North Las Vegas, Boulder City, and Henderson, the following new locations were added: Sparks, Fallon, Dayton, Sun Valley, Zephyr Cove, Winnemucca, Reno, and Amargosa Valley. Four educational sessions were conducted by Chapter staff in Las Vegas and Reno.
\$257,000 (\$100,000 + \$157,000)	Carson Advocates for Cancer Care	Cancer Patients	9 Northern Counties		784	8951	Provided health presentations to 8,951 students in 249 classrooms. Provided financial assistance to 784 patients. Average number of patients per month increased from 15 in January 2001 to 60 in June 2002. Published electronic newsletter for clients and medical community of Northern Nevada. Established 800 phone number for long distance applicants and clients.
\$436,000 (\$178,000 + \$258,000)	Endeavor (Effective 9/1/02 - became Easter Seals Southern Nevada)	Families with disabilities	Statewide		280		280 individuals with disabilities received a total of 67,063 hours of respite services. 150 of 156 returned final surveys reported a reduction in stress for the family; 140 reported the program enabled needed free time; 90 reported the program enabled more time with the rest of the family. The program served all of the original 170 families waitlisted; through increased program awareness, an additional 78 families were on the waiting list at the end of the grant period.

\$300,000 (\$150,000 + \$150,000)	NV Early Childhood Association for Special Children/Rural Respite	Children	Reno and Rural areas	29	122		122 Families with disabilities were provided 21,023 hours of respite services; 29 providers were trained in 20 communities throughout the state, with assistance from three Family Resource Centers. Another 116 providers were trained by the families utilizing the service. 96 of the 122 families receiving respite services returned satisfaction surveys, showing a 99% satisfaction rate.
\$385,265.20 (\$200,000 + \$250,000 - \$64,734.80)	UNR-Geriatric Medicine	Older Nevadans with disabilities	Statewide	434	50	265	Served 50 participants through rural visits, including 8 physicians, 13 medical students, 18 patients, and 11 caregivers. Trained 434 participants through 2 summer internships, 1 conference, ongoing Medical Student Geriatric Lunch Series, and Geriatric Medical Advisory Committee. Provided outreach to 265 contacts through medical student testing with geriatric patient models and financial contributions to the Provider's Certificate in Aging program. Participant evaluations of the summer institute averaged 4.5 on a scale of 1 to 5. Increased interest in program components was indicated through increased enrollment and participation. A business plan was developed for the Geriatric Resource Team to sustain economic viability and to teach medical students how to be financially successful while serving an elderly population. This plan will be used extensively in 2002-2003 when the Team begins to see patients.
\$500,000 (\$200,000 + \$300,000)	Washoe Medical Center	Persons with Diabetes	Northern Nevada		201	1023	Established comprehensive diabetes clinic to address physical, emotional and spiritual health of diabetic patients in Northern Nevada; 201 patients served on site. Referred patients are the "sickest of the sick;" program results are above the Community Standards of Practice. Outreach to 680 physicians through surveys, focus groups, case conferences, input on Community Guidelines for Diabetes Care, and 1:1 interactive education and support. Outreach to 343 children through classroom education, patient advocacy and assistance, and monthly support groups.
